FedRAMP Moderate Compliance Assessment Report

Report Identifier	CIQ-20260426-234449
Assessment Name	FedRAMP Moderate Assessment
Date Generated	2026-04-26T23:44:49Z
Tenant ID	`4a3eb5f4-1ec6-4a73-bb03-1ca63cb52d67`
Tenant Name	Contoso
Frameworks Evaluated	FedRAMP Moderate
Classification	CONFIDENTIAL — Authorized Recipients Only
Tool	PostureIQ AI Agent v1.0
Collection Method	Azure Resource Manager API + Microsoft Graph API (Read-Only)

CONFIDENTIALITY NOTICE: This document contains sensitive security and compliance information about the assessed environment. Distribution is restricted to authorized personnel only.

Audit Attestation

Assessment Scope	Control-plane configuration review of Azure and Microsoft Entra ID resources

Data Integrity	All evidence collected via read-only API calls; no tenant modifications were made
Evidence Records	39,975 records collected and evaluated
Report Hash (SHA-256)	`65ef4cf80c934c2ed9658210d568be776e85760feba8ef91d9c035632a571738`
Assessment Period	2026-04-26 23:44 UTC (point-in-time snapshot)

1. Executive Summary
2. Scope & Methodology

Assessed Environment Summary

RESOURCE CATEGORY	COUNT
Azure Subscriptions	4
Azure Resource Groups	67
Azure Resources	321
Azure Role Assignments	1,408
Azure Policy Assignments	180
Storage Accounts	20
Key Vaults	5
Virtual Networks	7
NSG Rules	17
Defender Plans	72
Entra Directory Roles	143
Entra Conditional Access Policies	6
Entra Application Registrations	69
Entra Service Principals	739

Risk Category Definitions

HIGH (Critical, High)

Direct security impact with immediate exploitation potential. Missing fundamental controls (MFA, excessive privileges, absent encryption). **Remediation: 0-30 days.**

MEDIUM

Configuration gaps exploitable under certain conditions. Incomplete defense-in-depth. **Remediation: 30-90 days.**

LOW

Best-practice deviations with minimal direct security impact. **Remediation: 90-180 days.**

2. Assessment Scope & Methodology

2.1 Scope

This assessment covers control-plane configurations of:

- **Azure Resources:** All accessible subscriptions, resource groups, resources, RBAC assignments, policy assignments, and diagnostic settings across 4 subscription(s).
- **Microsoft Entra ID:** Tenant configuration, directory roles, conditional access policies, application registrations, service principals, and user/group demographics.

2.2 Methodology

PostureIQ AI Agent v1.0 performs the following pipeline:

1. **Evidence Collection** — Read-only calls to Azure Resource Manager and Microsoft Graph APIs.
2. **Normalization** — Collected data transformed into standardized evidence records.
3. **Evaluation** — Evidence mapped to compliance framework controls and evaluated.
4. **Reporting** — Findings generated with severity ratings and remediation guidance.

Important Limitations: This assessment evaluates control-plane configurations only. Data-plane analysis is outside scope. No tenant resources were created, modified, or deleted.

5.3 Control Results (69)

How to read this table: Each row is a security control evaluated against the framework. Use the filters above to narrow results.

Severity indicates risk impact (Critical > High > Medium > Low). **Status** shows the evaluation result.

Description previews the primary observation. **Findings** counts distinct observations; **Resources** shows affected resources. Non-compliant controls have guidance in Section 7.

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
FedRAMP-AC-2(7)	Privileged User Accounts	FedRAMP Moderate	Governance & Risk	CRITICAL	MISSING EVIDENCE		0	0
FedRAMP-IA-2	Identification and Authentication (Organizational Users)	FedRAMP Moderate	Identity & Authentication	CRITICAL	COMPLIANT	CA policy 'Multifactor authentication for Microsoft partners and vendors' enforces MFA for all users.	3	3

7. Remediation Plan

Effort Summary

SEVERITY	FINDINGS	CONTROLS	RESOURCES	PRIORITY	TIMELINE
CRITICAL	21	2	11	P0	Immediate (0-14 days)
HIGH	236	25	206	P1	Urgent (0-30 days)
MEDIUM	21	7	15	P2	Short-term (30-90 days)

⚠ Immediate Actions (0-30 days)

#	CONTROL	TITLE	SEVERITY	RECOMMENDATION	TIMELINE
1	`FedRAMP-SC-28(4)b`	Storage Container Public Access Control	CRITICAL	Configure lifecycle management policies for data retention and tiering.	0-14 days
2	`FedRAMP-SC-28(4)b`	Storage Container Public Access Control	CRITICAL	Configure immutability policies on containers storing regulated data.	0-14 days

🕓 Short-Term Actions (30-90 days)

Address the remaining **7** medium-severity controls. Focus on domains with the highest gap counts first.

🔄 Continuous Improvement

1. **Re-assess after remediation** to verify fixes and update scores.
2. **Automate enforcement** via Azure Policy `Deny` / `DeployIfNotExists` assignments.
3. **Schedule regular scans** — integrate into CI/CD or run monthly.
4. **Consider phased remediation** — with 278 findings, prioritise critical/high first, then tackle medium/low in subsequent sprints.

8. Evidence Gaps

Missing Evidence (17 controls)

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-AC-2(3)	HIGH	FedRAMP	Feature Not Configured	Entra User Lifecycle Summary, Entra User Detail	No data was collected for evidence type 'entra-user-lifecycle-summary'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'entra-user-lifecycle-summary' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'entra-user-detail' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-AC-2(7)	CRITICAL	FedRAMP	Feature Not Configured	PIM Eligible Role Assignments, PIM Policy Rules (Activation Settings)	No PIM eligible role assignments were returned from Microsoft Graph. This typically means Privileged Identity Management (PIM) has not been onboarded in the tenant. If the tenant has Entra ID P2 licenses (standalone or via M365 E5 / EMS E5), PIM is available but requires a one-time activation. All privileged roles are currently standing (permanent) assignments with no just-in-time activation workflow.	▼ Resolution Steps 1. Open Entra admin center → Identity Governance → Privileged Identity Management. 2. Click 'Consent to PIM' if prompted (first-time onboarding). 3. Convert standing Global Admin and other privileged role assignments to PIM-eligible. 4. Configure activation rules: require MFA, set max duration (e.g. 8 hours), require justification. 1. Onboard PIM in Entra admin center → Identity Governance → Privileged Identity Management. 2. Open PIM → Entra Roles → Settings and configure activation rules for each role. 3. Set MFA on activation, maximum activation duration, and justification requirements.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-AU-12	HIGH	FedRAMP	Feature Not Configured	Entra Signin Summary, Entra Risk Summary	No data was collected for evidence type 'entra-signin-summary'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'entra-signin-summary' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'entra-risk-summary' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-AU-12(1)	MEDIUM	FedRAMP	Feature Not Configured	Entra Directory Audit Summary	No data was collected for evidence type 'entra-directory-audit-summary'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'entra-directory-audit-summary' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
FedRAMP-AU-12(3)	HIGH	FedRAMP	Feature Not Configured	Azure Database Config	No data was collected for evidence type 'azure-database-config'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-database-config' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-AU-6(3)	HIGH	FedRAMP	Feature Not Configured	Azure Sql Detailed	No data was collected for evidence type 'azure-sql-detailed'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-sql-detailed' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-IA-2(1)	CRITICAL	FedRAMP	Feature Not Configured	Entra Mfa Summary, Entra Mfa Registration	No data was collected for evidence type 'entra-mfa-summary'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'entra-mfa-summary' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'entra-mfa-registration' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-IR-6	HIGH	FedRAMP	Feature Not Configured	Defender Security Contact	No security contact configuration was found for Defender for Cloud. Email notifications for security alerts may not be configured.	▼ Resolution Steps 1. Azure Portal → Microsoft Defender for Cloud → Environment Settings. 2. Select subscription → Email notifications. 3. Add security contact email(s) and enable notifications for high-severity alerts.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-SC-28(2)	HIGH	FedRAMP	Feature Not Configured	Azure SQL Servers, Azure Sql Tde, Azure Sql Database, Azure Sql Firewall, Azure Sql Auditing, Azure Sql Vulnerability, Azure Sql Advanced Threat	No Azure SQL Server resources were found. If the environment does not use Azure SQL Database, this evidence type is not applicable.	▼ Resolution Steps 1. If Azure SQL is not in use, this can be classified as 'Not Applicable'. 2. If Azure SQL is expected, verify the scanning account has Reader access to the subscriptions containing SQL resources. 3. Check for SQL Managed Instances or other database services that may be in use. 1. Verify that the feature or resource related to 'azure-sql-tde' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-database' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs

						or resource related to 'azure-sql-advanced-threat' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
FedRAMP-SC-28(4)	HIGH	FedRAMP	Feature Not Configured	Azure Cosmosdb Account	No data was collected for evidence type 'azure-cosmosdb-account'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-cosmosdb-account' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-SC-28(5)	HIGH	FedRAMP	Feature Not Configured	Azure Database Server	No data was collected for evidence type 'azure-database-server'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-database-server' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
FedRAMP-SC-7(11)	HIGH	FedRAMP	Resource Not Deployed	Azure Firewall	No Azure Firewall resources were found in the subscriptions scanned. This does not necessarily indicate non-compliance — the environment may use NSGs, NVAs, or third-party firewalls instead.	▼ Resolution Steps 1. If Azure Firewall is required by your compliance framework, deploy one in a hub VNet. 2. If using alternative firewall solutions (NSGs, Palo Alto, Fortinet), document this as a compensating control. 3. No action needed if network security is enforced via other means.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-SC-7(21)	HIGH	FedRAMP	Feature Not Configured	Azure Ml Workspace	No data was collected for evidence type 'azure-ml-workspace'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-ml-workspace' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
FedRAMP-SC-7(23)	HIGH	FedRAMP	Feature Not Configured	Azure App Gateway	No data was collected for evidence type 'azure-app-gateway'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-app-gateway' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-SC-7(24)	HIGH	FedRAMP	Feature Not Configured	Azure Waf Policy	No data was collected for evidence type 'azure-waf-policy'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-waf-policy' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
FedRAMP-SC-8(2)	HIGH	FedRAMP	Feature Not Configured	Azure Apim Instance	No data was collected for evidence type 'azure-apim-instance'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-apim-instance' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
FedRAMP-SI-4(5)	HIGH	FedRAMP	Feature Not Configured	Risky Users (Identity Protection)	No risky user data was returned from the Identity Protection API. If the tenant has Entra ID P2 (via M365 E5 / EMS E5), Identity Protection is available but the sign-in risk and user risk policies may not be enabled, or there are genuinely no risky users detected (which is a positive finding).	▼ Resolution Steps 1. Open Entra admin center → Protection → Identity Protection. 2. Enable the Sign-in risk policy (e.g. block high risk, require MFA for medium). 3. Enable the User risk policy (e.g. require password change for high risk). 4. If no risky users appear in the portal, the API result is accurate (no risk detected).
