Mcsb Compliance Assessment Report

Report Identifier	CIQ-20260426-234449
Assessment Name	Mcsb Assessment
Date Generated	2026-04-26T23:44:49Z
Tenant ID	`4a3eb5f4-1ec6-4a73-bb03-1ca63cb52d67`
Tenant Name	Contoso
Frameworks Evaluated	Mcsb
Classification	CONFIDENTIAL — Authorized Recipients Only
Tool	PostureIQ AI Agent v1.0
Collection Method	Azure Resource Manager API + Microsoft Graph API (Read-Only)

CONFIDENTIALITY NOTICE: This document contains sensitive security and compliance information about the assessed environment. Distribution is restricted to authorized personnel only.

Audit Attestation

Assessment Scope	Control-plane configuration review of Azure and Microsoft Entra ID resources

Data Integrity	All evidence collected via read-only API calls; no tenant modifications were made
Evidence Records	39,975 records collected and evaluated
Report Hash (SHA-256)	`67a1ef4ab8fd789e59094f9cabb98926a82af7d4664114fee09730d5cf641a1d`
Assessment Period	2026-04-26 23:44 UTC (point-in-time snapshot)

1. Executive Summary
2. Scope & Methodology

Assessed Environment Summary

RESOURCE CATEGORY	COUNT
Azure Subscriptions	4
Azure Resource Groups	67
Azure Resources	321
Azure Role Assignments	1,408
Azure Policy Assignments	180
Storage Accounts	20
Key Vaults	5
Virtual Networks	7
NSG Rules	17
Defender Plans	72
Entra Directory Roles	143
Entra Conditional Access Policies	6
Entra Application Registrations	69
Entra Service Principals	739

Risk Category Definitions

HIGH (Critical, High)

Direct security impact with immediate exploitation potential. Missing fundamental controls (MFA, excessive privileges, absent encryption). **Remediation: 0-30 days.**

MEDIUM

Configuration gaps exploitable under certain conditions. Incomplete defense-in-depth. **Remediation: 30-90 days.**

LOW

Best-practice deviations with minimal direct security impact. **Remediation: 90-180 days.**

2. Assessment Scope & Methodology

2.1 Scope

This assessment covers control-plane configurations of:

- **Azure Resources:** All accessible subscriptions, resource groups, resources, RBAC assignments, policy assignments, and diagnostic settings across 4 subscription(s).
- **Microsoft Entra ID:** Tenant configuration, directory roles, conditional access policies, application registrations, service principals, and user/group demographics.

2.2 Methodology

PostureIQ AI Agent v1.0 performs the following pipeline:

1. **Evidence Collection** — Read-only calls to Azure Resource Manager and Microsoft Graph APIs.
2. **Normalization** — Collected data transformed into standardized evidence records.
3. **Evaluation** — Evidence mapped to compliance framework controls and evaluated.
4. **Reporting** — Findings generated with severity ratings and remediation guidance.

Important Limitations: This assessment evaluates control-plane configurations only. Data-plane analysis is outside scope. No tenant resources were created, modified, or deleted.

5.3 Control Results (53)

How to read this table: Each row is a security control evaluated against the framework. Use the filters above to narrow results.

Severity indicates risk impact (Critical > High > Medium > Low). **Status** shows the evaluation result.

Description previews the primary observation. **Findings** counts distinct observations; **Resources** shows affected resources. Non-compliant controls have guidance in Section 7.

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-DP-9	Storage Container Public Access Control	Mcsb	Data Protection	CRITICAL	NON-COMPLIANT	Storage 'aifutureinitiative' has no lifecycle management rules.	18	0
MCSB-IM-1	Use centralized identity and authentication system	Mcsb	Identity & Authentication	CRITICAL	COMPLIANT	Centralized identity via Entra ID with 6 active CA policies.	1	0
MCSB-IM-2	Protect identity and authentication systems	Mcsb	Identity & Authentication	CRITICAL	NON-COMPLIANT	No Conditional Access policies enforce MFA for administrators.	1	0
MCSB-IM-6	Use strong authentication controls - MFA Registration	Mcsb	Identity & Authentication	CRITICAL	COMPLIANT	MFA registration coverage adequate.	1	0
MCSB-LT-4	Enable network logging for security investigation - Defender Plans	Mcsb	Governance & Risk	CRITICAL	NON-COMPLIANT	Auto-provisioning not enabled for all.	3	0

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-PA-1	Separate and limit highly privileged/administrative users	Mcsb	Access Control	CRITICAL	NON-COMPLIANT	Active Global Administrators (1) within threshold (≤5).	3	0
MCSB-PA-7b	Follow just enough administration principle - PIM	Mcsb	Governance & Risk	CRITICAL	MISSING EVIDENCE		0	0
MCSB-AM-1	Asset Inventory and Tracking	Mcsb	Asset Management	HIGH	NON-COMPLIANT	5 managed identities inventoried.	3	0
MCSB-BR-1	Ensure Regular Automated Backups	Mcsb	Business Continuity	HIGH	NON-COMPLIANT	No Recovery Services vaults but 5 resources need backup protection.	1	0
MCSB-BR-2	Geo-Redundant Data Protection	Mcsb	Business Continuity	HIGH	NON-COMPLIANT	20 storage account(s) without geo-redundant replication: appproxypoctmp94922, datalakeforsentinel01, mcapsb1e7483be9eee6...	1	0
MCSB-DP-3	Encrypt sensitive data in transit	Mcsb	Data Protection	HIGH	NON-COMPLIANT	Web app 'aifutureinitiative' TLS version (1.0) < 1.2.	2	2
MCSB-DP-4	Enable data at rest encryption by default	Mcsb	Data Protection	HIGH	NON-COMPLIANT	VM 'AppProxy-Conn' OS disk not encrypted.	5	5
MCSB-DP-5	Use customer-managed key option in data at rest encryption - VM Security	Mcsb	Data Protection	HIGH	NON-COMPLIANT	VM 'AppProxy-Conn' OS disk not encrypted.	7	7

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-DP-5b	AI Services Data Protection	Mcsb	Data Protection	HIGH	NON-COMPLIANT	AI account 'ESIQNew-AI' has no managed identity.	70	70
MCSB-DP-6	Use a secure key management process - Web App Security	Mcsb	Data Protection	HIGH	NON-COMPLIANT	Web app 'aifutureinitiative' FTP allowed.	4	4
MCSB-DP-6b	Storage Account Data Protection	Mcsb	Data Protection	HIGH	NON-COMPLIANT	Storage 'aifutureinitiative' blob soft delete not enabled.	71	71
MCSB-DP-7	Use a secure certificate management process - SQL Security	Mcsb	Data Protection	HIGH	MISSING EVIDENCE		0	0
MCSB-DP-7b	Cosmos DB Data Protection	Mcsb	Data Protection	HIGH	MISSING EVIDENCE		0	0
MCSB-DP-8	Ensure security of key and certificate repository - AKS Security	Mcsb	Data Protection	HIGH	COMPLIANT	AKS security checks passed.	1	0
MCSB-DP-8b	Database Server Protection	Mcsb	Data Protection	HIGH	MISSING EVIDENCE		0	0
MCSB-GS-3	Define and implement security posture management strategy - Policy Compliance	Mcsb	Governance & Risk	HIGH	NON-COMPLIANT	216 custom policy definitions deployed.	2	0
MCSB-GS-8	AI Deployment Governance	Mcsb	Governance & Risk	HIGH	COMPLIANT	All 5 AI deployments have content filtering and rate limits.	1	0

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-IM-3	Manage application identities securely	Mcsb	Identity & Authentication	HIGH	COMPLIANT	No apps with expired credentials.	1	0
MCSB-IM-7	Restrict resource access based on conditions - Risky Users	Mcsb	Identity & Authentication	HIGH	MISSING EVIDENCE		0	0
MCSB-IM-8	Restrict the exposure of credential and secrets - Cross-Tenant	Mcsb	Identity & Authentication	HIGH	COMPLIANT	Cross-tenant access policy configured with no external partners.	1	0
MCSB-IR-1	Preparation - Incident Detection	Mcsb	Incident Response	HIGH	COMPLIANT	2 alert rules configured for incident detection.	2	0
MCSB-IR-2	Preparation - Security Contact	Mcsb	Incident Response	HIGH	MISSING EVIDENCE		0	0
MCSB-IR-3	Detection and Analysis - Alert Infrastructure	Mcsb	Incident Response	HIGH	NON-COMPLIANT	7 action group(s) exist but none have configured receivers.	2	0
MCSB-IR-4	Post-Incident - Investigation Readiness	Mcsb	Incident Response	HIGH	NON-COMPLIANT	10 Log Analytics workspace(s) available for investigation.	3	0
MCSB-LT-1	Enable threat detection capabilities	Mcsb	Logging & Monitoring	HIGH	COMPLIANT	61 Defender plans, 2 alert rules.	1	0
MCSB-LT-3	Enable logging for security investigation	Mcsb	Logging & Monitoring	HIGH	NON-COMPLIANT	Diagnostic coverage 60% (50-79%, below 80% target).	1	0
MCSB-LT-3b	SQL Server Threat Detection and Auditing	Mcsb	Data Protection	HIGH	MISSING EVIDENCE		0	0

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-LT-4b	Database Server Logging Configuration	Mcsb	Data Protection	HIGH	MISSING EVIDENCE		0	0
MCSB-LT-5	Centralize security log management and analysis - Monitoring	Mcsb	Logging & Monitoring	HIGH	NON-COMPLIANT	3 action groups with no receivers.	11	10
MCSB-LT-5b	Log Retention and Archival	Mcsb	Logging & Monitoring	HIGH	NON-COMPLIANT	Log Analytics 'DefaultWorkspace-9154cdcb-5a52-452a-b1e7-483be9eee6d2-EUS' retention 30d < 90 days.	15	15
MCSB-NS-1	Establish network segmentation boundaries	Mcsb	Network Security	HIGH	COMPLIANT	Network segmentation: 7 VNets, 17 NSG rules with no open-all inbound.	1	0
MCSB-NS-4	Deploy intrusion detection/intrusion prevention - Firewall	Mcsb	Network Security	HIGH	MISSING EVIDENCE		0	0
MCSB-NS-5b	ML Workspace Network Security	Mcsb	Network Security	HIGH	MISSING EVIDENCE		0	0
MCSB-NS-6	Container App Network Security	Mcsb	Network Security	HIGH	COMPLIANT	All 3 Container Apps pass network security checks.	1	0
MCSB-NS-7	Application Gateway WAF	Mcsb	Network Security	HIGH	MISSING EVIDENCE		0	0
MCSB-NS-8	API Management Network Security	Mcsb	Network Security	HIGH	MISSING EVIDENCE		0	0

CONTROL	TITLE	FRAMEWORK	DOMAIN	SEVERITY	STATUS	DESCRIPTION	FINDINGS	RESOURCES
MCSB-PA-7	Follow just enough administration principle	Mcsb	Access Control	HIGH	NON-COMPLIANT	Active high-privilege Entra role assignments (52) exceeds limit of 10.	3	0
MCSB-PA-8	Determine access process for cloud provider support - Access Reviews	Mcsb	Governance & Risk	HIGH	NON-COMPLIANT	No access reviews configured but privileged roles exist.	1	0

3	MCSB-DP-9	Storage Container Public Access Control	CRITICAL	Configure lifecycle management policies for data retention and tiering.	0-14 days
4	MCSB-DP-9	Storage Container Public Access Control	CRITICAL	Configure immutability policies on containers storing regulated data.	0-14 days

🕓 Short-Term Actions (30-90 days)

Address the remaining **3** medium-severity controls. Focus on domains with the highest gap counts first.

🔄 Continuous Improvement

1. **Re-assess after remediation** to verify fixes and update scores.
2. **Automate enforcement** via Azure Policy `Deny` / `DeployIfNotExists` assignments.
3. **Schedule regular scans** — integrate into CI/CD or run monthly.
4. **Consider phased remediation** — with 237 findings, prioritise critical/high first, then tackle medium/low in subsequent sprints.

8. Evidence Gaps

Missing Evidence (12 controls)

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-DP-7	HIGH	MCSB	Feature Not Configured	Azure SQL Servers, Azure Sql Tde, Azure Sql Database, Azure Sql Firewall, Azure Sql Auditing, Azure Sql Vulnerability, Azure Sql Advanced Threat	No Azure SQL Server resources were found. If the environment does not use Azure SQL Database, this evidence type is not applicable.	▼ Resolution Steps 1. If Azure SQL is not in use, this can be classified as 'Not Applicable'. 2. If Azure SQL is expected, verify the scanning account has Reader access to the subscriptions containing SQL resources. 3. Check for SQL Managed Instances or other database services that may be in use. 1. Verify that the feature or resource related to 'azure-sql-tde' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-database' exists in your environment.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
						2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-firewall' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-auditing' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-vulnerability' exists in your environment. 2. Check that the scanning account has sufficient permissions.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
						3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-sql-advanced-threat' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
MCSB-DP-7b	HIGH	MCSB	Feature Not Configured	Azure Cosmosdb Account	No data was collected for evidence type 'azure-cosmosdb-account'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-cosmosdb-account' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-DP-8b	HIGH	MCSB	Feature Not Configured	Azure Database Server	No data was collected for evidence type 'azure-database-server'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-database-server' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-IM-7	HIGH	MCSB	License / Feature Required	Risky Users (Identity Protection), Risk Detections (Identity Protection)	No risky user data was returned from the Identity Protection API. If the tenant has Entra ID P2 (via M365 E5 / EMS E5), Identity Protection is available but the sign-in risk and user risk policies may not be enabled, or there are genuinely no risky users detected (which is a positive finding).	▼ Resolution Steps 1. Open Entra admin center → Protection → Identity Protection. 2. Enable the Sign-in risk policy (e.g. block high risk, require MFA for medium). 3. Enable the User risk policy (e.g. require password change for high risk). 4. If no risky users appear in the portal, the API result is accurate (no risk detected). 1. Verify Entra ID P2 license is active. 2. Enable sign-in risk and user risk policies in Identity Protection. 3. Check Entra admin center → Protection → Identity Protection → Risk detections. 4. If the portal shows no detections, the result is accurate.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-IR-2	HIGH	MCSB	Feature Not Configured	Defender Security Contact	No security contact configuration was found for Defender for Cloud. Email notifications for security alerts may not be configured.	▼ Resolution Steps 1. Azure Portal → Microsoft Defender for Cloud → Environment Settings. 2. Select subscription → Email notifications. 3. Add security contact email(s) and enable notifications for high-severity alerts.
MCSB-LT-3b	HIGH	MCSB	Feature Not Configured	Azure Sql Detailed	No data was collected for evidence type 'azure-sql-detailed'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-sql-detailed' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-LT-4b	HIGH	MCSB	Feature Not Configured	Azure Database Config	No data was collected for evidence type 'azure-database-config'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-database-config' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
MCSB-NS-4	HIGH	MCSB	Resource Not Deployed	Azure Firewall	No Azure Firewall resources were found in the subscriptions scanned. This does not necessarily indicate non-compliance — the environment may use NSGs, NVAs, or third-party firewalls instead.	▼ Resolution Steps 1. If Azure Firewall is required by your compliance framework, deploy one in a hub VNet. 2. If using alternative firewall solutions (NSGs, Palo Alto, Fortinet), document this as a compensating control. 3. No action needed if network security is enforced via other means.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-NS-5b	HIGH	MCSB	Feature Not Configured	Azure Ml Workspace	No data was collected for evidence type 'azure-ml-workspace'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-ml-workspace' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-NS-7	HIGH	MCSB	Feature Not Configured	Azure App Gateway, Azure Waf Policy	No data was collected for evidence type 'azure-app-gateway'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-app-gateway' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection. 1. Verify that the feature or resource related to 'azure-waf-policy' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.

CONTROL	SEVERITY	FRAMEWORK	CATEGORY	EVIDENCE TYPES	EXPLANATION	RESOLUTION
MCSB-NS-8	HIGH	MCSB	Feature Not Configured	Azure Apim Instance	No data was collected for evidence type 'azure-apim-instance'. The collector may have returned empty results due to the resource or feature not being present in the environment.	▼ Resolution Steps 1. Verify that the feature or resource related to 'azure-apim-instance' exists in your environment. 2. Check that the scanning account has sufficient permissions. 3. Review collector logs for any errors during data collection.
MCSB-PA-7b	CRITICAL	MCSB	Feature Not Configured	PIM Eligible Role Assignments	No PIM eligible role assignments were returned from Microsoft Graph. This typically means Privileged Identity Management (PIM) has not been onboarded in the tenant. If the tenant has Entra ID P2 licenses (standalone or via M365 E5 / EMS E5), PIM is available but requires a one-time activation. All privileged roles are currently standing (permanent) assignments with no just-in-time activation workflow.	▼ Resolution Steps 1. Open Entra admin center → Identity Governance → Privileged Identity Management. 2. Click 'Consent to PIM' if prompted (first-time onboarding). 3. Convert standing Global Admin and other privileged role assignments to PIM-eligible. 4. Configure activation rules: require MFA, set max duration (e.g. 8 hours), require justification.
